Invoice (payment) information will be exposed only when payment details are available

#### What is Invoice?

It means a commercial document issued by a seller to a buyer relating to a sale transaction and indicating the products, quantities, and agreed-upon prices for products or services the seller had provided the buyer.

- 1 You can check the card information you registered when you paid.
- When you click the 'Update payment details' button, change the payment information through the PG payment pop-up window.
- When using Premium, information (period of use, price, date of subscription) is displayed, and when you click the subscription cancellation button, a subscription cancellation pop-up window is displayed.

When you cancel your Premium subscription, your premium status will be changed to inactive.

- You can check the period of use of Premium, and the functions of Premium are available within the remaining period of use.
- The cancellation date is displayed as inactivation state and the Resubscribe button is active.

You can use the functions of Premium again at any time through the Resubscribe button

What is Library? It is a page where users can check the list of analyzed projects. The amount of storage you have is displayed, and the storage capacity differs according to the Vidigo plan. - Free-Trial : Not available - Basic : 100MB - Premium : 5GB Project information (thumbnail, project name, storage period, capacity) is displayed, and when clicked, it moves to the analysis result page. The storage period of the projects stored in the library varies by Vidigo plan. - Free-Trial : Not available - Basic : Data storage for up to 1day - Premium : Data storage for up to 30day 3 When you click the More button, the RE-ANALYZE and DELETE menus are displayed. - When you click the RE-ANALYZE button, move to file upload screen. - When you click the DELETE button, delete the project. 4 You can select and delete multiple projects through the Edit button.

## 11/09 문구변경

#### What is Model?

It is a category of objects that can be detected through image analysis.

What is Model Customization? (It can analyze only human object.) Users themselves upload, perform machine learning, and display video analysis models. In order to detect unanalyzed objects (Unknown) in the analysis result, download images from the analysis result. Then, display the user model on the model display screen. After displaying the model, display the corresponding label, and upload the image corresponding to the label from the downloaded image. Through this process, if you check the model selection in the analysis model selection, you can detect objects that could not be analyzed first from the analysis screen results.

This allows users to obtain more detailed video analysis results and insights, and can add up to 30 personal models for each account and register 10 labels for each model. Also, label names of the same name per model cannot be registered.

When accessing the Model Customizations page, the Model Customizations Guide is displayed on the screen. You can check how to use it by moving left and right next to the image. When you click the "Do not show today" button, the guide does not appear even when you reconnect to the page.

**Precautions for Label Registration** Duplicate label names for one model cannot be registered.

## Precautions for Models and Labels Deletion

If there are analysis results in the library using a custom model, it is not possible to delete the model. (Model can be deleted after deleting analysis results from the library)

- When you click the Add Model button, the Add
- Model pop-up window is displayed and you input the model name. (You can input up to 15 characters)
- Select the model you want to delete from the Custom Models list and click the DELETE button. Deleted data is permanently deleted and cannot be recovered.
- You can check information about the model name, label name, and registration date in the LIST OF MODEL CUSTOMIZATIONS.

## 11/09 문구변경

1 Basic – Free Plan

This plan requires log-in and membership registration.

- Provides up to 30 kinds of object analysis.
   The image upload capacity is up to 100MB.
- which provides analysis data unlike Free-Trial, and stores analysis data up to 1 day.
- You can select and download statistical reports (PDF), and data (JSON, JPG, CSV) files.

2 Premium – Paid Plan

- This is a paid plan that requires payment.
- Login and membership are required and up to 5 image analysis models can be used at the same time.
- Provides up to 1GB of video upload capacity, 30 minutes of video time, and 5GB of large storage space.
- Provides a premium service differentiated from the free plan, such as storing analysis data for up to 30 days, displaying and managing your own analysis model, and providing dedicated GPU resources for AI analysis.

Enterprise – Paid Plan

This is a paid plan that allows customization.. When you click the Apply for Service button, move to the Contact page.

- Business customization and flexible payment options and custom contracts are available.
- Dedicated customer technical support and On-Premise are available.
- 4 Free-Trial Free Trial
  - This is a free trial service that anyone can use without logging in.
  - Provides up to 30 kinds of object analysis..
  - The image upload capacity is up to 50MB.
    The number of video analysis is limited to
  - once per day.

5 When you click the Try Premium button, move to the Premium payment page.

- When uploading an image file, the screen moves to that screen and you can check the uploaded file name
- Please input a project name (you can input up to 20 characters)
- 3 Please select a video genre for the project.
- You can check the Analysis Model Selection Guide.
- Free Trial and Basic can only select the 'Object' analysis model.
- Premium allows you to select multiple analysis models, and you can create and use your own analysis models.

1 Please select models you want to analyze.

Free-Trial, Basic : Only the object model is active, no other models are available.

- Premium : You can select all models and user models you have created yourself.
- When selecting analysis models, you can check the list of detection labels that can be analyzed.
- It can analyze only when you agree to all items in the consent to terms of service and guide for private information collection and use, and provision of personal information to third parties.
- 4 When clicking the Cancel button, return to File upload select screen.
- When clicking the Start Analysis button, the analysis starts, and if you do not input a file type, file URL, or project name, the analysis does not proceed.

The Top 10 label is an area where you can graphically check the count and detection rates of the top 10 most detected labels.

The scope of analysis can be checked with models and labels that can be analyzed in the Vidigo service.

- 1 The analysis model is divided into three categories: Vidigo Object, Brand Logo, and Celebrity, and a total of 9 analysis models are provided.
- 2 You can check the categories, detection types, and available member ratings of each model in the Model List.
- Free Trial , Basic : Only object model is available
- - Premium : All models and custom models you create are available

- When selecting an analysis model, a corresponding pop-up is displayed and you can check the sample video of the analysis model.
- It shows the category, the number of detection types, and available membership level information, and the analysis scope model differs depending on the member level.
- Analysis model name
- Category : a Category with analysis models
- Detection Type : Number of labels detected in the analysis model
- available membership : A membership available for analysis model
- Model Information : Provide model information

S The search function allows you to find labels that your analysis model can detect.
